About Me

As a Front End Developer passionate about creating intuitive, user-centric web applications, I excel in building modern interfaces that enhance user experiences. My expertise in frameworks like React and Next.js, combined with a keen eye for design and a solid understanding of Back End concepts, allows me to deliver performant and visually appealing solutions. Dedicated to continuous learning, I stay up-to-date with the latest web technologies to ensure my work consistently exceeds expectations.

Work Experience

Front End, Fox Ordering   **June 2024 - Present**

- Contributed to the development of the company's in-house CRM, enabling the sales team to migrate from third-party tools.
- Designed and implemented responsive landing pages tailored to marketing campaigns, ensuring high conversion rates.
- Collaborated closely with the Back End team to integrate CRM functionalities and streamline data management processes.

Front End, Pixju   **March 2024 - June 2024**

- Integrated interactive maps into a risk management software, improving data visualization and usability for end-users.
- Updated the codebase from JavaScript to TypeScript, enhancing maintainability and reducing potential runtime errors.

Full Stack, Shambala   **September 2023 - March 2024**

- Developed a learning management system (LMS) with Next.js 14, achieving near-perfect Lighthouse metrics.
- Introduced a new forum feature to the LMS, increasing user engagement.
- Improved website performance by 15% through optimized code and image loading techniques.

Front End, Partner   **February 2023 - September 2023**

- Designed and developed custom websites tailored to client requirements.
- Created an internal tool for generating email templates, boosting marketing team efficiency.
- Built a secure and user-friendly platform for uploading and managing invoice data.
