About Me

Front End Developer with 4 years of experience building web products with React, Next.js and TypeScript. I lead the front end at Fox Ordering, where I own the architecture of an in-house CRM and ship e-commerce and marketing sites. I work daily with an AI-assisted workflow (Claude Code with custom skills).

Skills

Core: TypeScript, JavaScript, HTML, CSS, SQL

Front End: React, Next.js, TanStack Start, TanStack Router, TanStack Query, TanStack Form, Astro, Vite, Tailwind CSS

Back End & Data: Node.js, NestJS, Django REST APIs, PostgreSQL (Neon), Prisma, Drizzle

E-commerce & CMS: Shopify (headless), WooCommerce (headless), WordPress

Testing & Tooling: Vitest, Cypress, Git, Vercel, Figma, Lighthouse

AI: Claude Code with custom skills, Vercel AI SDK, RAG with pgvector, AI-assisted testing and code review

Languages: Spanish (native), English (C1)

Work Experience

Front End Developer | Fox Ordering Jun 2024 – Present

- Lead and only front-end developer: made most technical decisions for the refactor of the in-house CRM from a React + Vite SPA to TanStack Start (TanStack Router, Query and Form) while shipping new modules on a Django backend.
- The CRM replaces third-party sales tools for 200+ users; the migration is underway, starting with a first group of 50.
- Launched 2 headless Shopify storefronts with Next.js and about 5 Astro marketing sites, including foxordering.com (EN/ES).
- Unit tests with Vitest, E2E tests with Cypress and Django backend contributions, using an AI-assisted workflow with Claude Code.

Front End Developer | Pixju Mar 2024 – Jun 2024

- Built interactive Leaflet maps for an enterprise security-risk platform, with markers and geographic layers to visualize security data.
- Migrated about a quarter of the backend from JavaScript to TypeScript.

Full Stack Developer | Shambala Sep 2023 – Mar 2024

- Built the company's main website and the front end of its learning platform (LMS) with Next.js 14.
- Turned the LMS into a more social platform with a NestJS backend and WebSockets for group chats and messaging, plus a forum.

Front End Developer | Partner Feb 2023 – Sep 2023

- Built Next.js apps to process invoices from a photo (OCR) and to create newsletter templates, and maintained the company's WordPress sites.

Projects

PickleFox pickle-fox.vercel.app

Platform for the pickleball community in Colombia: courts by city, players by level, partner search, matches and tournaments. Built almost entirely by me with Next.js and PostgreSQL (Neon).

Foxi, AI assistant for Fox Ordering github.com/AFPedreros/foxi-chatbot

RAG chatbot that answers questions about Fox Ordering from its own knowledge base. Vercel AI SDK with tool calling, OpenAI embeddings and PostgreSQL with pgvector, using Drizzle.

Ágape Medicina Estética (freelance) tienda.agapemedicinaestetica.com

Online store for an aesthetic medicine clinic, in Next.js on headless WooCommerce.

Education

Systems Engineering, Universidad ICESI (8 semesters completed) 2012 – 2016
